FILING RECEIPT CORRECTION REQUEST

In response to the Filing Receipt received February 19, 2002, (copy enclosed) the Applicants, through their attorney, respectfully request that the Filing Receipt be corrected. Also enclosed is a copy of the first page of the patent application as filed.

The filing receipt with Confirmation No. 1552 reads as follows:

ATTY DOCKET NO. 1002-MA

Title: Transparent tape roll with intermediate divider

The corrected filing receipt should read as follows:

ATTY DOCKET NO. **1002-MB**

Title: **PRESSURE SENSITIVE TAPE ROLL WITH INTERMEDIATE
DIVIDER**

Please correct the **Atty Docket No.** and the **Title** of the Invention and send a corrected filing receipt.

Respectfully submitted at Canton, Ohio, this 19th of March, 2002

CERTIFICATE OF MAILING

I certify that this correspondence is being deposited with the U.S. Postal Service as first class mail under 37 C.F.R. 1.8 and is addressed to the Assistant Commissioner for Patents, Washington, D.C. 20231 on this 19th day of March, 2002.

Connie L. Anderson

PRESSURE SENSITIVE TAPE ROLL WITH INTERMEDIATE DIVIDER

BACKGROUND OF THE INVENTION

1. TECHNICAL FIELD

This invention relates to rolled transparent adhesive media, and more specifically to rolled transparent tape such as packaging tape and mailing tape. Particularly, the invention is a plurality of windings of transparent pressure-sensitive tape rolled around a core with a non-transparent divider placed mid-way between the core and the outermost winding of tape such that the transparent tape is clear to the divider.

2. BACKGROUND INFORMATION

Pressure-sensitive media such as transparent tape have been readily available for decades for a variety of different uses. One of the common uses of transparent tape is to seal envelopes, boxes, cartons, or packages to be mailed or otherwise delivered.

Two types of commonly used pressure-sensitive tape for these purposes are mailing tape and packaging tape. In general, there is no difference in the end or final use of mailing tape versus packaging tape. It has however become common practice to refer to smaller rolls of pressure sensitive tape as mailing tape and larger rolls as packaging tape. Typically, the smaller rolls are many layers of rolled transparent pressure-sensitive tape wrapped around a 1½ inch diameter center core, while the larger rolls are many layers of rolled pressure-sensitive transparent tape wrapped around a 3 inch diameter center core.

This common practice has developed because consumers prefer pressure-sensitive tape rolls that are clear to the core and sufficient quantities of mailing tape to satisfy consumer demand may be rolled onto a smaller roll while the quantities of packaging tape expected are greater and must be rolled into a larger roll to maintain clarity. The reason for this preference is the perception that this clear to the core tape is of a higher quality. However, due to optical

Receipt is acknowledged of this nonprovisional Patent Application. It will be considered in its order and you will be notified as to the results of the examination. Be sure to provide the U.S. APPLICATION NUMBER, FILING DATE, NAME OF APPLICANT, and TITLE OF INVENTION when inquiring about this application. Fees transmitted by check or draft are subject to collection. Please verify the accuracy of the data presented on this receipt. If an error is noted on this Filing Receipt, please write to the Office of Initial Patent Examination's Customer Service Center. Please provide a copy of this Filing Receipt with the changes noted thereon. If you received a "Notice to File Missing Parts" for this application, please submit any corrections to this Filing Receipt with your reply to the Notice. When the USPTO processes the reply to the Notice, the USPTO will generate another Filing Receipt incorporating the requested corrections (if appropriate).
